Dated Mysore 18/19 July 1892.

From,

A. Rangaswami Iyengar Esquire
Deputy Commissioner

To,

The Chief Secretary to the Dewan
of Mysore

Sir,

With reference to Government Progs: No 15097/L 1606 dated 24th March 1892, enquiring as to how the indigenous Hospital is proposed to be worked, I have the honor to state that the opinions of the two principal members who advocated the establishment of the Hospital in question are somewhat conflicting: The late Mr. Subbaraya strongly advocated the active supervision by an Officer of the Medical Department. Mr. Annaya Pandit was on the other hand of opinion that no such supervision was necessary. On discussing the project with him again, he said he had no objection to an Offcial of the Medical Department exercising general superintendence and watching

watching the treatment of the patients,
but that such an Officer should not interfere
in the treatment employed and be competent
to over rule any medicines which may
be prescribed by the Vydyas. The question
is a delicate one; while it is of great
importance that there should be an
Officer of the Medical Department to
watch the progress of the Institution
and to guage the results of the treatment
in each case, it is difficult to define
his powers. This I would leave to Govern-
ment premising only that the patients
should be free to take medicine from
such of the Hakims or Vydyas employed
in the Hospital as they like, that the
said Hakim or Vydya should be at
liberty to pursue his own treatment
without let or hindrance so long as
the patient remains under his treatment,
that the Medical Officer should be
able to record the nature of each

patients' case, the treatment employed
and the result of such treatment, and
that he might also be entitled to advise
the Executive Officer of the Board to inter-
fere in any case in which he might be
of opinion that the treatment employed
was sure to be injurious to the patient.

I have the honor to be
